

Frequently asked questions – FAQ

January 2019

A urinal designed for women to reduce waiting lines in your events

WHY IS IT CLEANER?

- Because it's "no touch": we can enter without touching the doors (pushing them with the elbow, back of the hand, ...), pee, wipe and come out without touching anything inside the cabin.
- Because the bowl is ergonomic, facilitating the squat position
- Because there is a coat hook to hang his stuff without letting them touch the floor
- Because there is a large trash. You can't see the inside
- Because it's odorless: open cabin, continuous evacuation of urine
- Because the cabin is washable at high pressure with openings on the sides and on the ground to facilitate the cleaning service.

WHY IS IT FASTER? (20-50 seconds)

- Because it's open: partial opening of the structure, in a closed cabin, women take more time to apprehend the space
- Because you don't have to touch anything: hinged doors, no flush, bowl without any contact (many women lose time to avoid / protect themselves from contacts)
- Because the bowl is ergonomic: you don't have to grope to find the right position
- Because it's just to pee: service dedicated to urinating, better distribution of flux
- Because there is no interruption of service to empty the trash: the large trash empties from outside the toilet
- Because the occupation of the cabins is optimized: girls see free urinals at a glance

EVACUATION

- Standard drain pipes (40mm) at the rear
- Connection to external tanks using pumps or everything at the sewer
- Possibility of connecting several cabins with a single evacuation

COMMUNICATION

- During the events with a pictogram dedicated to the female urinal
- With suitable signage (on doors, inside the cabin, outside the toilet)
- With the madamePee team presents on the event
- Possibility to customize the cabin with the colors of the brand/event
- Presence of madamePee on medias and social networks

TRANSPORT AND STORAGE

- Cabs mountable and removable in 10 minutes
- Stored in storage cases
- Possibility to transport and store them already mounted (Europallet format)
